(54) Title: CATHETER AND METHOD, IN PARTICULAR FOR ABLATION AND LIKE TECHNIQUE

(57) Abstract: The invention relates to a catheter, provided with an elongated body with an electrically conductive first end, wherein through said body at least one live wire extends which is connected to said first end and a channel for feeding a cooling fluid through said body, which channel is provided, in or near said first end, with at least one outlet opening and wherein, in said first end, a temperature sensor has been arranged, while said channel is thermally insulated from said first end.
